Source: 338 records
32 participants
Eligible: 316 records
32 participants
Retained: 159 records
29 participants
22 excluded by ECG checks
TRAINING: 31 participants
Audio features + ECG targets
Fit scaler, model and threshold
freeze
TEST: one unseen participant
Audio features only
Frozen model and threshold
Acoustic recurrence
HR, RMSSD, interval SD
No ECG during extraction
Guided acoustic peaks
ECG-conditioned diagnostic
Separate from audio inference
Repeat for all 32 participants; evaluate error together with coverage
